## IS IT POSSIBLE TO EARN DAILY 3.5%?

Yes, let's understand how it is possible. Our bot checks every second of the market and waits for the right moment to open a trade. For every \$100 investment, our bot uses \$10 to open 0.10 lot size with calculated leverage. And it captures 50 points to 70 points and done for the per day target.

**BTC daily range is \$1200 to \$4000 and for our bot it's very easy to capture only 50 to 70 points.**

## WHY ONLY DAILY 3.5%?

Our bot makes daily 5% to 7% profit, but we share with you 3.5%. 0.50% for our server and other costs, 1% for affiliate sharing, 50% of remaining profit goes to the reserve fund and 50% profit is for the company.

**Simple and transparent calculation of profit.**
